Athletic Training Education Program

Athletic Training Technical Standards for Admission

The Athletic Training Education Program at Southern Illinois University is a rigorous and intense program that places specific requirements and demands on the students enrolled in the clinical program. The program is designed to prepare graduates to enter a variety of employment settings and to render care to a wide spectrum of individuals engaged in sports and physical activity. The technical standards set by the Athletic Training Education Program establish the essential qualities considered necessary for students admitted to this program to achieve the knowledge, skills, and competencies of an entry-level athletic trainer, as well as meet the expectations of the program's accrediting agency (Commission on Accreditation of Athletic Training Education [CAATE]). All students admitted to the SIUC ATEP must meet the following abilities and expectations. In the event a student is unable to fulfill these technical standards, with or without reasonable accommodation, the student will not be admitted into the program. Compliance with the program's technical standards does not guarantee a student's eligibility for the BOC certification exam. Candidates for selection to the SIUC Athletic Training Education Program must demonstrate:

- a. the mental capacity to assimilate, analyze, synthesize, integrate concepts and problem solve to formulate assessment and therapeutic judgments and to be able to distinguish deviations from the norm.
- b. sufficient postural and neuromuscular control, sensory function, and coordination to perform appropriate physical examinations using accepted techniques; and accurately, safely and efficiently use equipment and materials during the assessment and treatment of athletes or patients.
- c. the ability to communicate effectively and sensitively with patients and colleagues, including individuals from different cultural and social backgrounds. This includes, but is not limited to, the ability to establish rapport with patients and communicate judgments and treatments information effectively. Students must be able to understand and speak the English language at a level consistent with competent professional practice.
- d. the ability to record the physical examination results and a treatment plan clearly and accurately.
- e. the capacity to maintain composure and continue to function well during periods of high stress.
- f. the perseverance, diligence and commitment to complete the athletic training education program as outlined and sequenced.
- g. flexibility and the ability to adjust to changing situations and uncertainty in clinical situations.
- h. affective skills and appropriate demeanor and rapport that relate to professional education and quality patient care.

Candidates for selection to the SIUC ATEP are required to verify that they understand and meet these technical standards or that they believe that, with certain accommodations, they can meet the standards by signing below. Southern Illinois University Carbondale's Disability Support Services Office will evaluate a student who states the he/she could meet the program's technical standards with accommodation and confirm that the stated condition qualifies as a disability under applicable laws. If a student feels that he/she can meet the technical standards with accommodation, then the University will determine whether it agrees that the student can meet the technical standards with reasonable accommodation. This includes a review of whether the accommodations requested are reasonable, taking into account whether accommodation would jeopardize clinician/patient safety, and/or the educational process of the student or the institution, including all course work, clinical experiences and internships deemed essential to graduation.

I hereby attest that I have read and understand the Athletic Training Technical Standards of Admission. I further attest that I meet all specified Athletic Training Technical Standards of Admission.
